Dear Airport Commissioners and City Council,

I am opposed to the installation of new electronic billboards on airport property, and I urge you to vote to oppose the project from proceeding any further at the Airport Commissioner meeting on August 9th, 2021.

Trashing the natural environment of San Jose cannot be allowed to happen. The razing of 43 healthy trees for these new digital billboards is unacceptable. The arguments for digital billboards are bogus. There’s no significant money in it for the city, nor is it worth sacrificing our natural environment, architectural integrity and specifically the riparian wildlife along the Guadalupe River. Digital billboards will not improve the local economy. They certainly will not generate so-called “urban vibrancy” for which there is no data or evidence.

By allowing these first digital billboards in San Jose, the City may be opening the floodgates.

By allowing these first digital billboards in San Jose, the City may be opening the floodgates for dozens of additional billboards and litigation, like what has happened in Los Angeles.

Thirty-six years ago, the City Council enacted a ban on new billboards. The ban was established based on the belief that beautification was the best way to encourage economic development, a concept the city’s current leaders have been hell-bent to reverse. We should learn from our history, lest we be prone to repeat our past mistakes.

Thank you,

Dear Airport Commissioners and City Council,

I am STRONGLY opposed to the installation of new electronic billboards on airport property, and I urge you to vote to oppose the project from proceeding any further at the Airport Commissioner meeting on August 9th, 2021.

Trashing the natural environment of San Jose cannot be allowed to happen. The razing of 43 healthy trees for these new digital billboards is unacceptable.

Nearly 60 foot wide electronic billboards will distract drivers and lead to less safe driving conditions. How is that in the Community's best interest?

The arguments for digital billboards are false. There’s no significant money in it for the city, nor is it worth sacrificing our natural environment, architectural integrity and specifically the riparian wildlife along the Guadalupe River. Digital billboards will not improve the local economy. They certainly will not generate so-called “urban vibrancy” for which there is no data or evidence.

By allowing these first digital billboards in San Jose, the City may be opening the floodgates.

These billboards are OPPOSED by the majority of our area residents. Please vote NO on this proposal.

Digital billboards will not improve the local economy. They certainly will not generate so-called “urban vibrancy” for which there is no data or evidence. By allowing these first digital billboards in San Jose, the City may be going downhill as in lacking a downtown hospital ...

To SJ City Council: even more urgent is to resolve the fact that downtown San Jose has no Hospital!

With all the influx (think google village & high towers) people especially elderly! can get stuck in traffic & die on their way to afar away hospital due to a heart attack.
If you do your calculations right, the chance that one dies from covid-19 in Sj downtown is roughly the same as dying from a heart attack in downtown SJ!

To NoSJBillBoards:
It would be much better to focus now on responsible candidates for SJ Council elections.

Best. ~ Carolus Boekema

[External Email]

Dear Airport Commissioners and City Council,

I am opposed to the installation of new electronic billboards at all, including on airport property. I urge
you to vote to oppose the project from proceeding any further at the Airport Commissioner meeting on
August 9th, 2021.

The razing of 43 healthy trees for these new digital billboards is unacceptable. The arguments for digital
billboards are weak. There’s no significant money in it for the City, nor is it worth sacrificing our natural
environment, architectural integrity, and specifically the riparian wildlife along the Guadalupe River.
Digital billboards will not improve the local economy. They certainly will not generate so-called “urban
vibrancy” for which there is no data or evidence. They will increase light pollution, traffic collisions, and
energy use. They are eyesores and unwanted.

Please oppose all digital billboards.

Thanks,
Charlotte

Dear Airport Commissioners and City Council,

I am vehemently opposed to the installation of new electronic billboards on airport property, or anywhere in San Jose for that matter, and I urge you to vote to oppose the project from proceeding any further at the Airport Commissioner meeting on August 9th, 2021. Don't trash the valuable little natural environment of San Jose we have. For downtown residents the Guadalupe River trail is our only little slice of wilderness nearby. The razing of 43 healthy trees for these new digital billboards is unacceptable.

Whatever money this would raise for the city is not worth it – raise our taxes instead. It's not worth sacrificing our natural environment, architectural integrity, and the wildlife along the Guadalupe River.

I cannot express strongly enough how much I think digital billboards are a bad idea that will degrade the city and our quality of life.

Sincerely,
Chris Kurose
San Jose

Dear Airport Commissioners and City Council,

I am opposed to the installation of new electronic billboards on airport property, and I urge you to vote to oppose the project from proceeding any further at the Airport Commissioner meeting on August 9th, 2021.

Trashing the natural environment of San Jose cannot be allowed to happen. The razing of 43 healthy trees for these new digital billboards is unacceptable. The arguments for digital billboards are bogus. There’s no significant money in it for the city, nor is it worth sacrificing our natural environment, architectural integrity and specifically the riparian wildlife along the Guadalupe River. Digital billboards will not improve the local economy. They certainly will not generate so-called “urban vibrancy” for which there is no data or evidence.

By allowing these first digital billboards in San Jose, the City may be opening the floodgates%

Dear Airport Commissioners and City Council,

I am strongly opposed to the installation of new electronic billboards on airport property, and I urge you to vote to oppose the project at the Airport Commissioner meeting on August 9th, 2021.

The arguments for digital billboards are not supported by credible data. I'm concerned about the environmental impact of these signs. I find energy consuming and e-waste generating signs inconsistent with the cities stated interest in addressing climate change. The financial benefit to the city is limited and the aesthetic cost is huge. Please don't allow our city to be blighted and drivers dangerously distracted by these digital billboards.

Respectfully yours,

Connie F. Springer
San José, CA 95124

We see advertisements constantly online, on television, and in the media. We are surrounded by ads. The last thing we need is to deface the city's natural beauty and purposely install billboards that serve no one else but the people who install them and the people who advertise on them.

Would you like a billboard installed in your neighborhood? If your answer is no, it's probably for many of the same reasons the majority of people who voiced their opinions about billboards in San Jose and I are opposed to having more installed in our city.

Let's spend resources on more public art, not more ads.

Please vote against this terrible idea.

David Chai

[External Email]

Dear Airport Commissioners and City Council,

I am opposed to the installation of new electronic billboards on airport property, and I urge you to vote to oppose the project from proceeding any further at the Airport Commissioner meeting on August 9th, 2021.

Pre-pandemic I was driving to and from my workplace in San Mateo and every electronic billboard I saw was an irritating distraction, which was actually hazardous at night, as it was too bright. I even developed an antipathy to the brands I saw on these billboards.

Trashing the natural environment of San Jose cannot be allowed to happen. The razing of 43 healthy trees for these new digital billboards is unacceptable. The arguments for digital billboards are bogus. There’s no significant money in it for the city, nor is it worth sacrificing our natural environment, architectural integrity and specifically the riparian wildlife along the Guadalupe River. Digital billboards will not improve the local economy. They certainly will not generate so-called “urban vibrancy” for which there is no data or evidence.

By allowing these first digital billboards in San Jose, the City may be opening the floodgates to mindless commercialization of visual space, where natural beauty of Silicon Valley is replaced by the billboard architecture like in a farcical cartoon.

With kind regards,

Elena Shur

Digital billboards will not improve the local economy. They certainly will not generate so-called “urban vibrancy” for which there is no data or evidence.

By allowing these first digital billboards in San Jose, the City may be opening the floodgates for dozens of additional billboards and litigation, like what has happened in Los Angeles.

Thirty-six years ago, the City Council enacted a ban on new billboards. The ban was established based on the belief that beautification was the best way to encourage economic development, a concept the city’s current leaders have been hell-bent to reverse. We should learn from our history, lest we be prone to repeat our past mistakes.

Thank you.

Dear Airport Commissioners and City Council,

I am strongly opposed to the installation of new electronic billboards on airport property, and I urge you to vote to oppose the project from proceeding any further at the Airport Commissioner meeting on August 9th, 2021. With most of the citizens opposed to the e-billboards, why are you not listening? It’s SOO frustrating when sane arguments against the e-billboards as in the paragraph below are not only compelling, but make sense and should not only be considered, but adhered to.

Trashing the natural environment of San Jose cannot be allowed to happen. The razing of 43 healthy trees for these new digital billboards is unacceptable. The arguments for digital billboards are bogus. There’s no significant money in it for the city, nor is it worth sacrificing our natural environment, architectural integrity and specifically the riparian wildlife along the Guadalupe River. Digital billboards will not improve the local economy. They certainly will not generate so-called “urban vibrancy” for which there is no data or evidence.

By allowing these first digital billboards in San Jose, the City may be opening the floodgates!

Thank you for listening!

Respectfully,
Hannelore McCrumb

Subject: I oppose the electronic billboards proposal on airport
property

[External Email]

Dear Airport Commissioners and City Council,

I am opposed to the installation of new electronic billboards on airport
property, and I urge you to vote
to oppose the project from proceeding any further at the Airport
Commissioner meeting on August 9th,
2021.

Trashing the natural environment of San Jose cannot be allowed to happen. The razing of 43 healthy
trees for these new digital billboards is unacceptable. The arguments for
digital billboards are bogus.
There’s no significant money in it for the city, nor is it worth sacrificing our natural environment,
architectural integrity and specifically the riparian wildlife along the
Guadalupe River. Digital billboards
will not improve the local economy. They certainly will not generate so-called “urban vibrancy” for
which there is no data or evidence.

By allowing these first digital billboards in San Jose, the City may be opening the floodgates

Thank you,
Ian Bruce

NO! NO! NO! THOSE BILLBOARDS DO NOT BELONG HERE.

This is not Las Vegas or Times Square and I never want it to be.

Keep San Jose a beautiful place remembered for rose gardens, clean highways and peaceful surroundings. The Valley of Heart’s Delight does not deserve such a fate and neither does its citizens. Do not destroy the beauty we have worked hard to create in our city.

By allowing these first digital billboards in San Jose, the City may be opening the floodgates. These billboards also go against the community’s wishes which were expressed in an extensive poll. If the airport is in need of such advertisement opportunities why not put them at the pick up and drop off crosswalk areas? This way the billboards are targeting all who use the airport and they are kept in the visual noise/clutter of the airport.

Dear Airport Commissioners and City Council,

I am strongly opposed to the installation of new electronic billboards on airport property, and I urge you to vote to oppose the project at the upcoming Airport Commissioner meeting on August 9th, 2021.

The installation of electronic billboards will damage our natural environment, violate our architectural integrity, and do significant harm to the riparian wildlife along the Guadalupe River. Digital billboards will not generate significant revenue and will not improve the local economy. This is a bad deal that will not contribute to making San Jose a vital, vibrant and successful urban environment.

Furthermore, these first digital billboards in San Jose may open the doors to dozens of additional billboards and litigation, similar to what has happened in Los Angeles.

Thirty-six years ago the City Council enacted a ban on new billboards. The ban was established based on the belief that beautification was the best way to encourage economic development, a concept the city’s current leaders have been hell-bent to reverse. We should learn from our history, lest we be prone to repeat our past mistakes.

Thank you.

Dear Airport Commissioners and City Council,<nblink>

Please, please, please…….

No electronic billboards!!!!!
This is for many reasons, including more than the following:

1. By definition, they are unsafe. They are meant to be looked at to convey their message. This distracts from driving. This is compounded by being very bright to actually draw attention. These WILL cause an increase in accidents, by some amount. Tge city putting them up, is like the city endorsing looking at text messages while driving!!!!!

2. They are electricity based. This is an unnecessary use of electricity, by the city! I recognize that this is a relatively small amount, but what message does this send to all of us?!!!! The brightness of these seem like a lot of electricity use – which conveys a message of “don’t worry about electrical usage”

3. Having billboards is an unnecessary visual blockage/eyesore. There is NO aesthetic benefit for these. They are actually a detriment. During this time where we are dealing with too many detriments that the city does nit effectively manage, this is just adding to reasons to NOT be in San Jose. (Discarded furniture and trash that lay in place for weeks downtown, and additionally the trash snd garbage surrounding pop up homeless sites, are two examples of under managed conditions.
I have loved and contributed to San Jose. I moved from a home in a nice quiet suburb in San Jose in 1989, and still live near SJSU. These under managed conditions are motivating me to consider moving. Having the City consider putting up electronic billboards makes me shake my head in wonderment, and actually disbelief. The city claims “COVID!!” and other reasons for under-managing pressing issues - but if what the do accomplishment is actually electronic billboards, then I am truly angry.

This is a TERRIBLE idea. Please, please don’t do it.

Best regards,
Ken.

I agree will the following, but did not write it......5

By allowing these first digital billboards in San Jose, the City may be opening the floodgates for dozens of additional billboards and litigation, like what has happened in Los Angeles.

Thirty-six years ago, the City Council enacted a ban on new billboards. The ban was established based on the belief that beautification was the best way to encourage economic development, a concept the city’s current leaders have been hell-bent to reverse. We should learn from our history, lest we be prone to repeat our past mistakes.

Thank you.

Dear Airport Commissioners and City Council,

Like numerous other city residents, I am opposed to the installation of new electronic billboards on airport property, despite knowing the projected revenue for the city. Therefore, I ask you to vote to oppose the project from proceeding any further at the Airport Commissioner meeting on August 9th, 2021.

Billboards in any form are blight. Digital billboards pose known threats to safe driving and wildlife. The razing of 43 healthy trees for these new digital billboards is completely unacceptable, particularly when there is no requirement that 43 trees be replanted in San Jose.

Digital billboards will neither improve the local economy or generate so-called urban vibrancy, for which there is no conclusive data or evidence. No tourist will seek out San Jose because of its digital billboards. No resident will boast about the city’s digital billboards. By allowing these first digital billboards in San Jose, the city will reverse decades of sound urban planning that specifically addressed this issue.

Dear Airport Commissioners and City Council,

I am opposed to the installation of new electronic billboards on airport property, and I urge you to vote to oppose the project from proceeding any further at the Airport Commissioner meeting on August 9th, 2021.

Trashing the natural environment of San Jose cannot be allowed to happen. The razing of 43 healthy trees for these new digital billboards is unacceptable. The arguments for digital billboards are bogus. There’s no significant money in it for the city, nor is it worth sacrificing our natural environment, architectural integrity and specifically the riparian wildlife along the Guadalupe River. Digital billboards will not improve the local economy. They certainly will not generate so-called “urban vibrancy” for which there is no data or evidence.

By allowing these first digital billboards in San Jose, the City may be opening the floodgates%

Dear Airport Commissioners and City Council,

I am opposed to the installation of new electronic billboards on airport property or elsewhere in the city, and I urge you to vote to oppose the project from proceeding any further at the Airport Commissioner meeting on August 9th, 2021.

I moved to San Jose 22 years ago, attracted by the juxtaposition of a modern city with historic neighborhoods and interesting old architecture. I liked the mix of the old and the new and what I saw as its charm and although I could have gone anywhere, I chose to stay in San Jose. In recent years, it seems the focus is on a kind of frenzied building at all costs, and without any thought given to beauty or cohesiveness. I am very concerned about the direction the City is going in.

Digital billboards are ugly, distracting, and have a negative effect on their surroundings. Pushing for digital billboards when respondents have made it clear they are not welcome means that the powers-that-be don’t care what the people want. I feel that allowing these hideous digital billboards anywhere in the city is a slap in the face to the majority of people who said we don’t want them. The fact that trees will have to be destroyed to install them is just another insult.

I urge you to consider the wishes of the people and vote against this project.

Thank you,

Krista Van Laan

Dear Airport Commissioners and City Council,

I am absolutely opposed to the installation of new electronic billboards on airport property, and I urge you to vote to oppose the project from proceeding any further at the Airport Commissioner meeting on August 9th, 2021. The city's own survey shows that nearly 93% of the public strongly oppose this scheme as well.

There detriment to the city of this project is potentially enormous. Forget about the sunk cost, and drop the digital billboard plan now.

Trashing the natural environment of San Jose cannot be allowed to happen. The razing of 43 healthy trees for these new digital billboards is unacceptable. The arguments for digital billboards are bogus. There's no significant money in it for the city, nor is it worth sacrificing our natural environment, architectural integrity and specifically the riparian wildlife along the Guadalupe River. Digital billboards will not improve the local economy. They certainly will not generate so-called "urban vibrancy" for which there is no data or evidence.

By allowing these first digital billboards in San Jose, the City will be opening the floodgates for dozens of additional billboards. Litigation is likely to follow, like what has happened in Los Angeles.
Thirty-six years ago, the City Council enacted a ban on new billboards. The ban was established

[External Email]

Dear Airport Commissioners and City Council,

I am opposed to the installation of new electronic billboards on airport property, and I urge you to vote to oppose the project from proceeding any further at the Airport Commissioner meeting on August 9th, 2021.

I recently had to drive down to the Los Angeles area and was appalled at the number of DISTRACTING electronic billboards all over the highways. If that is what you want to happen here in San Jose, it will be devastating to the wildlife, destroy what little dark night we have to see the stars, and a strong potential for increased accidents.

According to a study conducted by the Caltrans Division of Research and Innovation, their study (2012) determined that findings from the literature support the argument that while there is no definitive research showing increased crashes due to the presence of billboards or digital billboards, there is an increased crash risk based on research on the effects of billboards on driver attention and the effects of driver distraction on safety:

Billboards can have a significant effect on driver speed, lateral control, mental workload, ability to follow road signs, and eye movements and fixations, with older drivers particularly affected. (The Effects of Visual Clutter on Driving Performance and Driven to Distraction, An Evaluation of the Influence of Roadside Advertising on Road Safety, and Review of Roadside Advertising Signs). And visual clutter
generally can distract drivers (Driver Distraction by Advertising).

Distractions such as electronic billboards can heighten safety risks in heavy traffic and other complex driving conditions, a conclusion by Berkeley-based Jerry Wachtel, in his recent review of billboard distraction studies conducted everywhere from Denmark to South Dakota. Other types of signs without these problems are available to be installed. NOT ELECTRONIC BILLBOARDS...NONE!!!

Mary Tucker
Downtown San Jose resident
